PROFESSIONAL SUMMARY

Backend Software Engineer with 2+ years of experience delivering **High-Availability Fintech Infrastructure** for leading Spanish institutions like **MAPFRE** and **Singular Bank**. Specialized in **DDD** and Event-Driven architectures using the **Java/Kotlin ecosystem**. Proven track record in accounting systems and reconciliation workflows refactoring legacy services for **performance gains (49.8% improvement)** while ensuring data integrity and alignment with **EBA/BIAN standards**.

EXPERIENCE

- Keifi By Izertis** Granada, Spain
Software Engineer Aug 2024 – Present
 - Performance Engineering:** Led the refactoring of critical payment services using **Java 17 and Virtual Threads**, achieving a **49.8% improvement** in high-throughput transaction processing.
 - Architectural Design (MAPFRE):** Architected a transitory/omnibus **Accounting and Billing** system. Applied **DDD** to model complex Reconciliation, Invoicing and Reporting workflows to ensure 100% consistency.
 - Event-Driven Microservices:** Developed and scaled microservices using **Spring Boot and Apache Kafka**, implementing contract-first API design (OpenAPI) for seamless fintech integration.
 - Data Infrastructure:** Optimized **PostgreSQL** query performance and orchestrated **GitLab CI/CD** pipelines for secure and traceable deployments in highly regulated environments.
 - Collaboration:** Collaborated across teams to launch fast and iterate on platform stability, increasing impact for shoppers.
- Keifi By Izertis (Internship)** Granada, Spain
Backend Developer Intern Jan 2024 – June 2024
 - Investment Platform:** Optimized legacy SQL and refactored Spring Boot modules for the **Mapfre Afin** platform, reducing API latency and improving scalability of financial data distribution.
 - Security Frameworks:** Researched financial API architectures focusing on **OAuth2/OpenID Connect**, serving as the foundation for my Master's Thesis on secure Fintech frameworks.

EDUCATION

- M.Sc. in Computer Science & Engineering** Granada, Spain
Universidad de Granada Sep. 2024 – Feb. 2026
 - Master's Thesis (TFM):** Framework for **Financial APIs**, focusing on Security (OAuth2), **PSD2/BIAN**, and High-Scalability architectures. **Grade: 9.8/10**.
- B.Sc. in Computer Science & Engineering** Granada, Spain
Universidad de Granada Sep. 2020 – July 2024
 - Bachelor's Thesis (TFG):** Developed a reactive eSports platform with **complex relational schemas** and real-time processing. **Grade: 9.5/10**.
 - Achievements:** Specialization in Information systems. Focusing on Software Engineering, Advanced Database Management, and Enterprise Systems.

TECHNICAL SKILLS

- Programming Languages:** Java (17/21), Kotlin, SQL (PostgreSQL, MySQL), Scala, C++, JavaScript.
- Backend & Data:** Spring Boot, Webhooks, Hibernate/JPA, Apache Kafka, Redis, Microservices, REST APIs, DDD.
- Cloud & Infra:** AWS, GCP, Docker, Kubernetes, GitLab CI/CD, Git, Terraform (Basics).
- Testing & Quality:** JUnit 5, Mockito, Spock, TDD approach, Performance & Stress Testing
- Spoken Languages:** Spanish (Native), English (B2 - Professional Working Proficiency), French (Basic).

KEY PROJECTS

- RedBlockChain-core:** Developed a P2P blockchain solution in Java. Implemented custom transaction validation and node architecture to ensure network integrity.
- Pseudorandomometric API:** Kotlin/Spring Boot API for high-volume **synthetic data generation**, implementing **SecureRandom** standards for cryptographic security.
- HTT Plugins (Team Lead):** Led a team of 4 developers to build a custom Java-based plugin for minecraft servers focused on custom gameplay mechanics integrating with Bukkit/Spigot APIs.
